VIA DEL PIGNETO 91 ° CHICCEN ° 19, TUBA ° VIA ASCOLI PICENO 3 ° HOBO ART CLUB  
ROMA ° FROM 4TH JUNE TO THE 28TH 2009, 6 - 10 PM

**OPENING 4TH JUNE FROM 20 PM**

Dimensione massima 10x12 cm is a collective show which finds its connecting point in small format photographs, printed maximum 10x12 cm, the size of a contact print of large format film. A reversal of perspective, in respect to a gaze often flooded by a continuous flow of visual information and by the noisy imposition of the presence of things.

The dimension of this perceptive intimacy is based on visions to search for things which play on their discreet individuality and re-ascend the pleasure of attention to details, of the analysis of single elements which compose the image. It is based on the joy of discovering emotions that are made of a simple and subtle balance.

In an exhibition which is a possible mapping of a way of being, we want to recreate that space of suspension where the ability of being astonished is not derived from intense emotions. The closer one gets, the more the context permits details to reveal themselves.

A place where things are found even before they are shown, getting to know that which most often goes unobserved, something precious, not always striking, contained, which needs attention and is often made of little things.

About 70 photographers take part of the exhibition, from young beginners to consolidated authors, international collectives and photo-bloggers, photo-reporters and people in of the arts scene, amateurs and image surfers of the 2.0 web.

The name of all the participants on-line.
